

NO  
GOING BACK

update

**Welcome to a brief update on the The Livery Company initiative, No Going Back,** which is now in its 3rd year and we are delighted that our 32nd Livery Company has recently joined us.

Thank you to all the amazing **volunteers** from Livery Companies who have become involved. We have 120 volunteers who have worked with people both in the prison and the community and each one has made a major contribution to the success of NGB.

Visit our new **website [www.nogoingback.uk](http://www.nogoingback.uk)** which will explain everything you might need to know about how No Going Back works.

We are also attaching our **2nd Evaluation Report**. We are delighted that this independent Impact Report shows the Social Return on Investment for every £1 spent on NGB is an impressive £12.64 of social value. This has been generated over two years through economic benefits, avoided public spending, and health and wellbeing gains for those involved.

We still need Livery Companies to come forward and support NGB and help us achieve even more. Not only are volunteers invaluable but **we need Company members who can refer jobs** through their network of contacts. Owing to the support of the Livery so far we have been able to broaden the job opportunities available including, amongst many others, hospitality which accounted for 25% of our job outcomes.

We hope very much to hear from you.

Best regards

*Johnny Robertson*
